1. Page Numbering. Page numbers appear in the upper-right corner of the page. Pages are numbered sequentially. New pages may occasionally be added to the tariff. When a new page is added, the page appears as a decimal. For example, a new page added between pages 34 and 35 would be 34.1.
2. Page Revisions Numbers. Page Revision Numbers also appear in the upper-right corner of the page. These numbers are used to determine the most current page revision on file with the Michigan Public Service Commission. For example, the fourth revised Page 34 cancels the third revised Page 34. Because of deferrals, notice periods, *etc.*, the most current page number on file with the Commission is not always the tariff page in effect. (C)

3. Paragraph Numbering Sequence. There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.

  - 1.1.1.A.1.(a)(I)(i)
  - 1.1.1.A.1.(a)(I)(i)(1)
4. Check List of Effective Pages. When a tariff filing is made with the Commission, an updated Check List of Effective Pages (“Check List”) accompanies the tariff filing. The Check List lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check List is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on the Check List if these are the only changes made to it (i.e., the format, *etc.*). Customers should refer to the latest Check List to find out if a particular page is the most current page on file with the Commission.

SECTION 3 - DESCRIPTION OF SERVICES3.1. Telecommunications Services (cont'd)3.1.8. Custom Calling Features

3.1.8.A. Service Offerings available to Customer's and End Users of Sage's local exchange service on local access lines only, subject to availability from the central office serving the customer:

1. Repeat Dialing - Enables the customer to redial automatically the last outgoing telephone number. If the telephone number is busy, Auto Redial will keep trying to call the number for a maximum of thirty (30) minutes, beginning with the customer's activation of Repeat Dialing, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed. Repeat Dialing is available as a monthly plan or on a per use basis. Per use functionality is automatically provisioned on all lines. The customer may request to have Repeat Dialing taken off its lines.
2. Call Screening - Enables the customer to block calls from pre-selected telephone numbers and/or the last incoming call (without knowing the number). To block specified telephone numbers, the customer builds a screening list of up to 31 telephone numbers. To block an unknown number after receiving a call, the customer enters a code to add the number to their screening list. If facilities are unavailable to provide incoming call screening via the customer's list, standard call completion will occur. Customers whose telephone numbers are blocked are directed to a recorded announcement.
3. Call Forwarding - Enables the customer to transfer all incoming calls to another telephone number within the exchange or on the Long Distance Telecommunications Network. The Call Forwarding customer is responsible for the payment of charges (e.g., toll charges) for each call between his Call Forwarding-equipped telephone and the telephone to which the call is being forwarded.

Includes Busy Line and Don't Answer features, as defined below. Customer may decline these additional features.

Call Forwarding - Busy Line allows incoming calls that encounter a busy condition to be forwarded to a pre-designated telephone number within the exchange or on the Long Distance Telecommunications Network.

Call Forwarding - Don't Answer allows incoming calls which are not answered after a pre-determined number of rings to be automatically forwarded to a pre-designated telephone number within the exchange or on the Long Distance Telecommunications Network.

---

SECTION 3 - DESCRIPTION OF SERVICES3.1. Telecommunications Services (cont'd)3.1.8. Custom Calling Features (cont'd)3.1.8.A. Service Offerings (cont'd)

4. Automatic Callback - Enables the customer to redial automatically the last incoming telephone number. If that telephone number is busy, Call Return will keep trying to call the number for a maximum of thirty (30) minutes beginning with the customer's activation of Automatic Callback in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed. This service will not function if the calling party's telephone number has been Call Forwarded. Also, this service will not function from a line that does not have an associated telephone number, e.g., multi-line hunting groups. Automatic Callback is available as a monthly plan or on a per use basis. Per use functionality is automatically provisioned on all lines. The customer may request to have the per use functionality taken off its lines.
5. Call Waiting - Alerts a customer who is using his telephone that another caller is trying to reach him. Where facilities permit, Call Waiting subscribers may deactivate Call Waiting for the duration of one call. Call Waiting is automatically reactivated for the next originating or terminating call.
6. Multi-Ring Service - Multi-Ring Service permits a customer to establish up to three telephone numbers on the same access line and to distinguish calls to each number by distinctive incoming ring patterns. The billing telephone number is the "master" number and the other telephone numbers are "dependent" numbers. The standard ringing pattern is provided for the master number while distinctive ringing patterns are provided for a maximum of two dependent numbers. (T)

When a Multi-Ring Service customer subscribes to any Call Forwarding feature, dependent numbers can either be forwarded to the same number as the master number or receive no forwarding treatment at all.

When a Multi-Ring Service customer subscribes to Call Waiting, incoming calls to the master number will activate the standard Call Waiting tone. Incoming calls to the dependent numbers will activate a distinctive Call Waiting tone per dependent number.

A directory listing is furnished per telephone number. When a customer requests the dependent numbers to be nonpublished or nonlisted, Sage Telecom will provide without charge. However, if the master number and all dependent numbers are nonpublished and/or nonlisted, the appropriate monthly rate is applicable to the master number.

SECTION 3 - DESCRIPTION OF SERVICES3.1. Telecommunications Services (cont'd)3.1.8. Custom Calling Features (cont'd)

## 3.1.8.A. Service Offerings (cont'd)

7. Speed Calling - Enables a customer to place calls to other telephone numbers by dialing a one- or two-digit code rather than the complete telephone number. Customer may store up to eight (8) or thirty (30) telephone numbers.
8. Three-Way Calling - Enables a customer to add a third party to an existing call without operator assistance, thereby establishing a three-way conversation.
9. Wait & See - Call Waiting ID - When a person is already speaking on the telephone and receives another phone call, Wait & See service will allow for the display of the name and/or number of the new caller on the customer's CPE. This service allows the customer to decide if he wants to answer the new incoming call.

Wait & See is offered subject to the following limitations:

- a. Customers must also subscribe to Call Waiting and Caller ID Name and Number.
- b. Customers are responsible for furnishing their own compatible CPE, which should include the Caller ID capability necessary to display the calling party's name and/or number.
- c. Available only where central office facilities permit.

3.1.8.B. Calling features are subject to availability of facilities and compatibility with central office equipment, access lines, and customer premises equipment.

3.1.8.C. Repeat Dialing, Call Screening, Automatic Callback, Call Forwarding and Caller ID are functional when both the call originating customer and the call terminating customer are served from central offices capable of sending and receiving the Calling Party Number (CPN) and are linked by appropriate facilities.

3.1.8.D. Services with call forwarding capabilities (including Call Forwarding, Call Forwarding-Busy Line, Call Forwarding-Don't Answer) cannot be used on a continual basis to expand the local calling scope beyond that available to a customer's premise.

---

**SECTION 3 - DESCRIPTION OF SERVICES****3.1. Telecommunications Services (cont'd)**

3.1.9. **Caller ID Service** - Display of Calling Number and/or Name on customer provided equipment. Available to Customers and End Users of Sage's local exchange service on local access lines only. Service includes:

3.1.9.A. **Calling Number Delivery** - Allows the transmission of Calling Party Number (CPN) to the subscriber's access lines. When a Calling Number Delivery equipped line is on-hook, CPN is transmitted across the line during the silent interval between the first and second ring.

3.1.9.B. **Calling Name Delivery** - Enables the Caller ID subscriber to identify the calling party by a displayed name before the call is answered. The displayed name is the name associated with the CPN. When a Calling Name Delivery equipped line is on-hook, the Calling Party Name is transmitted across the line during the silent interval between the first and second ring.

3.1.9.C. **Calling Name and Number Blocking** - Any Sage Telecom calling party may prevent the delivery of CPN and of Calling Party Name to the called party by dialing an access code (\*67 on their touch-tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code activated per call blocking is available at no charge. If a calling party activates blocking, the CPN and Calling Party Name will not be transmitted across the line. Instead, the Caller ID subscriber will receive an anonymous indicator. This anonymous indicator notifies the Caller ID subscriber that the calling party chose to block name and number delivery.

Free "per line" blocking is available to Crisis Intervention Centers and certain law enforcement agencies. Any qualified party requesting "per line" blocking must submit an application to Sage for review and approval.

Caller ID subscribers must provide and connect their own compatible customer premises equipment (CPE) to process the Calling Number and/or Calling Name transmission. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. Sage assumes no liability and will be held harmless for an incompatibility of this equipment to perform satisfactorily with the network features described herein.

Subscribers will automatically be provided with both Calling Number and Calling Name delivery, subject to availability in the central office that is servicing the subscriber. If the combination of the two is not available, the subscriber will receive whatever is available, either Calling Number OR Calling Name.

Caller ID features are subject to availability of facilities and compatibility with central office equipment (for both the calling and the called parties), access lines, and customer premises equipment.

Caller ID information will not be displayed under the following conditions: (a) if the called party is off-hook; or (b) if the called party answers during the first ring interval.

Telephone CPN information transmitted via Caller ID is intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by this tariff. (T)

3.1.10.A. **Series Hunting** - The hunt for an idle access line starts with the called access line in a prearranged hunt group and ends with the last access line in the hunt group, completing the call to the first idle access line encountered. Unless the first access line in the hunt group is called, only a portion of the access line group is hunted.

3.1.10.B. **Circle Hunting** - Permits a complete hunt over all the access lines in a prearranged access line hunt group. If no idle access line is encountered, the hunting will continue until it reaches the access line that was originally called.

3.1.10.C. **Preferential Hunting** - Individual access lines in an access line hunt group may have an associated preferential hunt list. 3.1.11. **Maintenance of Service** - The Customer shall be responsible for the payment of all related charges for each service call by a Sage employee or contractor to the customer's premises where the service difficulty or trouble results from the use of terminal equipment, communications systems or premises cable and wire on the customer's side of the demarcation point.

3.1.11.A **Trouble Ticket Trip Fee** - Applies for each dispatch when a technician is dispatched and no trouble is found on the Company's side of the demarcation point. This charge also applies when a technician does not have access to the customer's premises to repair the problem during the prescheduled window or when the technician isolates the problem to the Customer-Provided-Equipment (CPE). (C)

3.1.11.B **Emergency Service Call Charge** - Applies for each dispatch outside a normally scheduled work day where an off duty technician is called in to perform the work. If more than one technician is dispatched in conjunction with the same trouble report, the charge applies to each technician.
