TARIFF FORMAT SHEET

1. **Page Numbering.** Page numbers appear in the upper-right corner of the page. Pages are numbered sequentially. New pages may occasionally be added to the tariff. When a new page is added, the page appears as a decimal. For example, a new page added between pages 34 and 35 would be 34.1.
2. **Page Revisions Numbers.** Page Revision Numbers also appear in the upper-right corner of the page. These numbers are used to determine the most current page revision on file with the Oklahoma Corporation Commission. For example, the fourth revised Page 34 cancels the third revised Page 34. Because of deferrals, notice periods, *etc.*, the most current page number on file with the Commission is not always the tariff page in effect. Business Customers should consult with check sheet for the page currently in effect. (CT)
3. **Paragraph Numbering Sequence.** There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.
 - 1.
 - 1.1.
 - 1.1.1.
 - 1.1.1.A.
 - 1.1.1.A.1.
 - 1.1.1.A.1(a)
 - 1.1.1.A.1(a)(I)
 - 1.1.1.A.1(a)(I)(i)
 - 1.1.1.A.1(a)(I)(i)(1)
4. **Check List of Effective Pages.** When a tariff filing is made with the Commission, an updated Check List of Effective Pages ("Check List") accompanies the tariff filing. The Check List lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check List is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the Check List if these are the only changes made to it (i.e., the format, *etc.*). Customers should refer to the latest Check List to find out if a particular page is the most current page on file with the Commission.
5. **Symbols Used in This Tariff.**

1. Auto Redial - Enables the customer to redial automatically the last outgoing telephone number. If the telephone number is busy, Auto Redial will keep trying to call the number for a maximum of thirty (30) minutes, beginning with the customer's activation of Auto Redial, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed. Auto Redial is available as a monthly plan or on a per use basis. Per use functionality is automatically provisioned on all lines. The customer may request to have Auto Redial taken off its lines.
2. Call Blocker - Enables the customer to block calls from pre-selected telephone numbers and/or the last incoming call (without knowing the number). To block specified telephone numbers, the customer builds a screening list of up to 31 telephone numbers. To block an unknown number after receiving a call, the customer enters a code to add the number to their screening list. If facilities are unavailable to provide incoming call screening via the customer's list, standard call completion will occur. Customers whose telephone numbers are blocked are directed to a recorded announcement.
3. Call Forwarding - Enables the customer to transfer all incoming calls to another telephone number within the exchange or on the Long Distance Telecommunications Network. The Call Forwarding customer is responsible for the payment of charges (e.g., toll charges) for each call between his Call Forwarding-equipped telephone and the telephone to which the call is being forwarded.

Also, this service will not function from a line that does not have an associated telephone number, e.g., multi-line hunting groups. Call Return is available as a monthly plan or on a per use basis. Per use functionality is automatically provisioned on all lines. The customer may request to have the per use functionality taken off its lines.
5. Call Trace - Enables the customer to initiate a trace of the last completed incoming call by dialing an activation code before receiving another call. If a trace is successful, Call Trace will record the incoming call detail (not the conversation). A successful trace cannot be made if the incoming call originates in a central office not equipped for Call Trace service. The customer will not be provided the results of the trace (*i.e.*, the telephone number traced). Such call detail may be provided only to law enforcement authorities upon proper request.

For further action to be taken, the customer is required to contact Sage Telecom via the telephone number provided in the Call Trace announcement.

At its opinion or upon receipt of proper request from a law enforcement agency, Sage will set up a temporary tracing arrangement using Call Trace or manual trap and trace where Call trace is not available at no charge to the customer when in the judgment of Sage or law enforcement agency, the unwanted call(s) present a serious threat of bodily harm or destruction of property.

9. Personalized Ring - Personalized Ring service permits a customer to establish up to three telephone numbers on the same access line and to distinguish calls to each number by distinctive incoming ring patterns. The billing telephone number is the "master" number and the other telephone numbers are "dependent" numbers. The standard ringing pattern is provided for the master number while distinctive ringing patterns are provided for a maximum of two dependent numbers.

When a Personalized Ring customer subscribes to any Call Forwarding feature, dependent numbers can either be forwarded to the same number as the master number or receive no forwarding treatment at all.

When a Personalized Ring customer subscribes to Call Waiting, incoming calls to the master number will activate the standard Call Waiting tone. Incoming calls to the dependent numbers will activate a distinctive Call Waiting tone per dependent number.

All charges incurred to access the remote number will be billed appropriately.
12. Selective Call Forwarding - Provides the customer with the ability to forward incoming calls from pre-selected telephone numbers to another telephone number. The customer may construct or modify a telephone number screening list. Selective Call Forwarding will screen incoming calls against the customer's list and forward only those calls from telephone numbers on the list. The maximum amount of telephone numbers available for each customer's list may vary depending on switch type. The Selective Call Forwarding customer is responsible for the payment of charges (e.g., toll charges) for each call between the Selective Call Forwarding equipped telephone line and the line to which the call is being forwarded. Calls from numbers not on the list will receive standard call completion.

The access code activated per call blocking is available at no charge. If a calling party activates blocking, the CPN and Calling Party Name will not be transmitted across the line. Instead, the Caller ID subscriber will receive an anonymous indicator. This anonymous indicator notifies the Caller ID subscriber that the calling party chose to block name and number delivery.

Per-line blocking will be offered at no charge to a requesting customer if 1) the applicable line(s) is used serving domestic violence victims, serving shelters for domestic violence victims, or serving public safety investigators (police investigators, probation and parole officers, etc.), or 2) Sage Telecom receives from the customer written certification that the customer has a compelling need for per-line blocking. 3.1.10.C. Preferential Hunting - Individual access lines in an access line hunt group may have an associated preferential hunt list. This hunt list specifies a hunting sequence over a predetermined subset or preferential arrangement of up to 18 access lines before proceeding to hunt through the remaining access line hunt group.

Each hunt group arrangement is subject to availability in the customer's serving central office switch. All of the lines in a hunt group arrangement must be of the same class of service (*i.e.*, same local calling plan).

SECTION 3 - DESCRIPTION OF SERVICES

3.1. Telecommunications Services (cont'd)

3.1.11. **Maintenance of Service** - The Customer shall be responsible for the payment of all related charges for each service call by a Sage employee or contractor to the customer's premises where the service difficulty or trouble results from the use of terminal equipment, communications systems or premises cable and wire on the customer's side of the demarcation point.

3.1.11.A **Trouble Ticket Trip Fee** - Applies for each dispatch during a normally scheduled work day where a technician is on duty. A normally scheduled work day is defined as 8AM to 5PM, Monday through Friday. If more than one technician is dispatched in conjunction with the same trouble report, the charge applies to each technician. This charge also applies to dispatches during a normally scheduled work day where the technician(s) could not access the premises. (CT)

3.1.11.B **Emergency Service Call Charge** - Applies for each dispatch outside a normally scheduled work day where an off duty technician is called in to perform the work. If more than one technician is dispatched in conjunction with the same trouble report, the charge applies to each technician.

3.1.11.C **NID Move Charge** - Applies for each dispatch related to relocating the customer's Network Interface Device (NID). This charge is in addition to either the Standard or Emergency Repair Charge, which will be determined based on the time of the dispatch.

3.1.12. **Individual Case Basis (ICB) Arrangements** - Arrangements may be developed on a case-by-case basis in response to a bona fide request from a Customer or prospective Customer to develop a competitive bid for a service not generally offered under this tariff. ICB rates will be offered to the Customer in writing and on a non-discriminatory basis. The requested service or arrangements are not offered under other sections of this tariff. The facilities utilized to provide the requested service or arrangements are of a type normally used by the Company in furnishing its other services. The requested service or arrangements are compatible with other Company services, facilities, and its engineering and maintenance practices. These offerings are subject to the availability of necessary Company personnel and capital resources.

3.1.13. **9-1-1 Telecommunication Service** - All terms and conditions set forth in this Section are applicable to the services as defined in this Tariff.

3.1.13.A. **Service Overview**

6. 9-1-1 Service may be classified as one of two types: Basic Service and Enhanced Service.
 - (a) Basic 9-1-1 Service provides for routing all 9-1-1 calls originated by telephone having telephone numbers beginning with a given central office prefix code or codes to a single PSAP that is prepared to receive those calls. Basic 9-1-1 Service has certain inherent features and optional features that may or may not be available with Enhanced 9-1-1 Service.
 - (b) Enhanced 9-1-1 Service provides certain features such as selective routing of 9-1-1 calls to a specific PSAP that is selected from the various PSAP serving Business Customers within that central office area. Enhanced 9-1-1 Service has certain other inherent and optional features that may or may not be available with Basic 9-1-1 Service.

3.1.13.B. Regulations (These regulations apply to both Basic and Enhanced Service, as appropriate.)

3.1.14. **Toll Restriction Service** - An optional, central office activated, service which prohibits anyone from originating a direct dialed (1+) or an operator assisted (0 or 0+) outgoing long distance call from a designated local exchange access line. Any such calls, when attempted, will be routed to a central office announcement which will inform the user that long distance calls are restricted from that line.

- 3.1.14.G. The customer indemnifies and saves harmless Sage Telecom from any and all claims, losses and damages that may be caused by Toll Restriction Service.

3.1.15. Dual Service

Dual Service, as part of an outside/physical move of telephone service, provides Sage business customers the ability to have service at both the old and the new location at the same time.

- 1. At the time a service order is placed to physically move telephone service, the customer may specify a period of time, not to exceed 30 days, that they want to receive Dual Service.
- 2. Dual Service can be provided as long as the customer's new location is served by the same Central Office, which is normally the case when the customer is able to keep their existing phone number(s).
