Many international telecommunications companies impose additional fees to complete telephone calls to wireless devices, including mobile phones, pagers, personal computers and personal digital assistants. These additional fees also apply to other wireless and landline telephone numbers for special services as designated by the foreign telephone administration. In order to recover these additional fees, Sage may apply higher per minute rates to calls completed to wireless devices and special services in the affected countries. The rate amount varies by country and applies to all calls that are placed to a wireless device or special service.

SECTION 2. TERMS AND CONDITIONS

2.1 Use and Availability of Service

- 2.1.1 Service is furnished to the User for any lawful purpose. Service shall not be used for any unlawful purpose, nor used in such a manner as to interfere unreasonably with the use of Service by any other Users.
- 2.1.2 The use of the Company's Services without payment for Service or attempting to avoid payment for Service by fraudulent means or devices, false or invalid numbers, or false calling or credit cards is prohibited.
- 2.1.3 The Company's Services may be denied for non-payment of charges or for other violations of the terms and conditions set forth in this document.
- 2.1.4 The use of the Company's Services to make calls which might reasonably be expected to frighten, abuse, torment, or harass another is prohibited.
- 2.1.5 Service temporarily may be refused or limited because of system capacity limitations.
- 2.1.6 Service is subject to transmission limitations caused by natural (including atmospheric, geographic or topographic) or artificial conditions adversely affecting transmission.
- 2.1.7 Service to any or all Customers may be temporarily interrupted or curtailed due to equipment modifications, upgrades, relocations, repairs and similar activities necessary for proper or improved operations.
- 2.1.8 Services provided pursuant to this document may be utilized only for the transmission of communications by Customers consistent with the terms of this document, the rules and regulations of the FCC, and the requirements of the Communications Act of 1934, as amended by the Telecommunications Act of 1996.
- 2.1.9 The use and restoration of Service during emergency conditions shall be in accordance with Appendix A to Part 64 of the FCC's rules and regulations, 47 C.F.R. 64.401, which specifies the priority system for service.
- 2.1.10 Residential service offerings that include unlimited usage are limited to use for residential voice applications. This includes service offerings providing for unlimited local usage, unlimited intraLATA usage and/or unlimited interLATA usage. No commercial use of any form is permitted for such unlimited service offerings. Incidental calling for dial-up Internet access, for data and fax type applications and for other restricted uses reflected in this tariff is permitted up to a maximum of 1200 minutes within any consecutive thirty-day period; any such usage beyond this threshold shall be presumed to be non-residential in nature. If, at any time, the Company determines that the Customer's usage is non-residential or is not consistent with use for residential voice applications, the Company may immediately take actions to enforce adherence to this tariff and to the Company's Statement of Terms and Conditions of Service that are applicable to interLATA and international long distance. Such actions may include the transition to a higher tier within the customer's existing service plan.

The Company will notify the Customer in writing when the previous month's usage exceeds that normally associated with residential voice applications. Such written notice will inform the Customer that a higher tier rate will apply if, after two additional months, the usage remains above usage thresholds established in the existing service plan. Customers whose excessive usage levels resulted in a higher rate will, upon request, qualify for the lower-tier rate(s) after three consecutive months of usage below usage thresholds established in the existing service plan.

Many international telecommunications companies impose additional fees to complete telephone calls to wireless devices, including mobile phones, pagers, personal computers and personal digital assistants. These additional fees also apply to other wireless and landline telephone numbers for special services as designated by the foreign telephone administration. In order to recover these additional fees, Sage may apply higher per minute rates to calls completed to wireless devices and special services in the affected countries. The rate amount varies by country and applies to all calls that are placed to a wireless device or special service.
