1. Page Numbering. Page numbers appear in the upper-right corner of the page. Pages are numbered sequentially. New pages may occasionally be added to the tariff. When a new page is added, the page appears as a decimal. For example, a new page added between pages 34 and 35 would be 34.1.
2. Page Revisions Numbers. Page Revision Numbers also appear in the upper-right corner of the page. These numbers are used to determine the most current page revision on file with the Kansas Corporation Commission. For example, the fourth revised Page 34 cancels the third revised Page 34. Because of deferrals, notice periods, *etc.*, the most current page number on file with the Commission is not always the tariff page in effect. (CT)

Per use functionality is automatically provisioned on all lines. The customer may request to have the per use functionality taken off its lines.
5. Call Trace - Enables the customer to initiate a trace of the last completed incoming call by dialing an activation code before receiving another call. The billing telephone number is the "master" number and the other telephone numbers are "dependent" numbers. The standard ringing pattern is provided for the master number while distinctive ringing patterns are provided for a maximum of two dependent numbers.

When a Personalized Ring customer subscribes to any Call Forwarding feature, dependent numbers can either be forwarded to the same number as the master number or receive no forwarding treatment at all.

When a Personalized Ring customer subscribes to Call Waiting, incoming calls to the master number will activate the standard Call Waiting tone. Incoming calls to the dependent numbers will activate a distinctive Call Waiting tone per dependent number.

A directory listing is furnished per telephone number. When a customer requests the dependent numbers to be non-published or non-listed, Sage Telecom will provide without charge. 3.1.10. **Multi-Line Hunting Service** - This service is used to establish hunting arrangements between two or more of a customer's local exchange service access lines, and is available to Business and Residential Customers. Customers may choose from one of the following hunt group arrangements:

3.1.10.A. **Series Hunting** - The hunt for an idle access line starts with the called access line in a prearranged hunt group and ends with the last access line in the hunt group, completing the call to the first idle access line encountered. Unless the first access line in the hunt group is called, only a portion of the access line group is hunted.

3.1.10.B. **Circle Hunting** - Permits a complete hunt over all the access lines in a prearranged access line hunt group. If no idle access line is encountered, the hunting will continue until it reaches the access line that was originally called.

3.1.10.C. **Preferential Hunting** - Individual access lines in an access line hunt group may have an associated preferential hunt list. This hunt list specifies a hunting sequence over a predetermined subset or preferential arrangement of up to 18 access lines before proceeding to hunt through the remaining access line hunt group.

Each hunt group arrangement is subject to availability in the customer's serving central office switch. All of the lines in a hunt group arrangement must be of the same class of service (*i.e.*, same local calling plan).

3.1.11. **Maintenance of Service** - The Customer shall be responsible for the payment of all related charges for each service call by a Sage employee or contractor to the customer's premises where the service difficulty or trouble results from the use of terminal equipment, communications systems or premises cable and wire on the customer's side of the demarcation point.

3.1.11.A **Trouble Ticket Trip Fee** - Applies for each dispatch when a technician is dispatched and no trouble is found on the Company's side of the demarcation point. This charge also applies when a technician does not have access to the customer's premises to repair the problem during a prescheduled window or when the technician isolates the problem to the Customer-Provided-Equipment (CPE). (CT)

3.1.11.B **Emergency Service Call Charge** - Applies for each dispatch outside a normally scheduled work day where an off duty technician is called in to perform the work. If more than one technician is dispatched in conjunction with the same trouble report, the charge applies to each technician.

3.1.11.C **NID Move Charge** - Applies for each dispatch related to relocating the customer's Network Interface Device (NID). This charge is in addition to either the Standard or Emergency Repair Charge, which will be determined based on the time of the dispatch. (CT)

3.1.12. **Individual Case Basis (ICB) Arrangements** - For special situations, rates for specialized services will be determined on an Individual Case Basis and specified by agreement between Sage and the Customer.
